Edward Vong

I worked on vscode which may run things really differently than other IDEs.
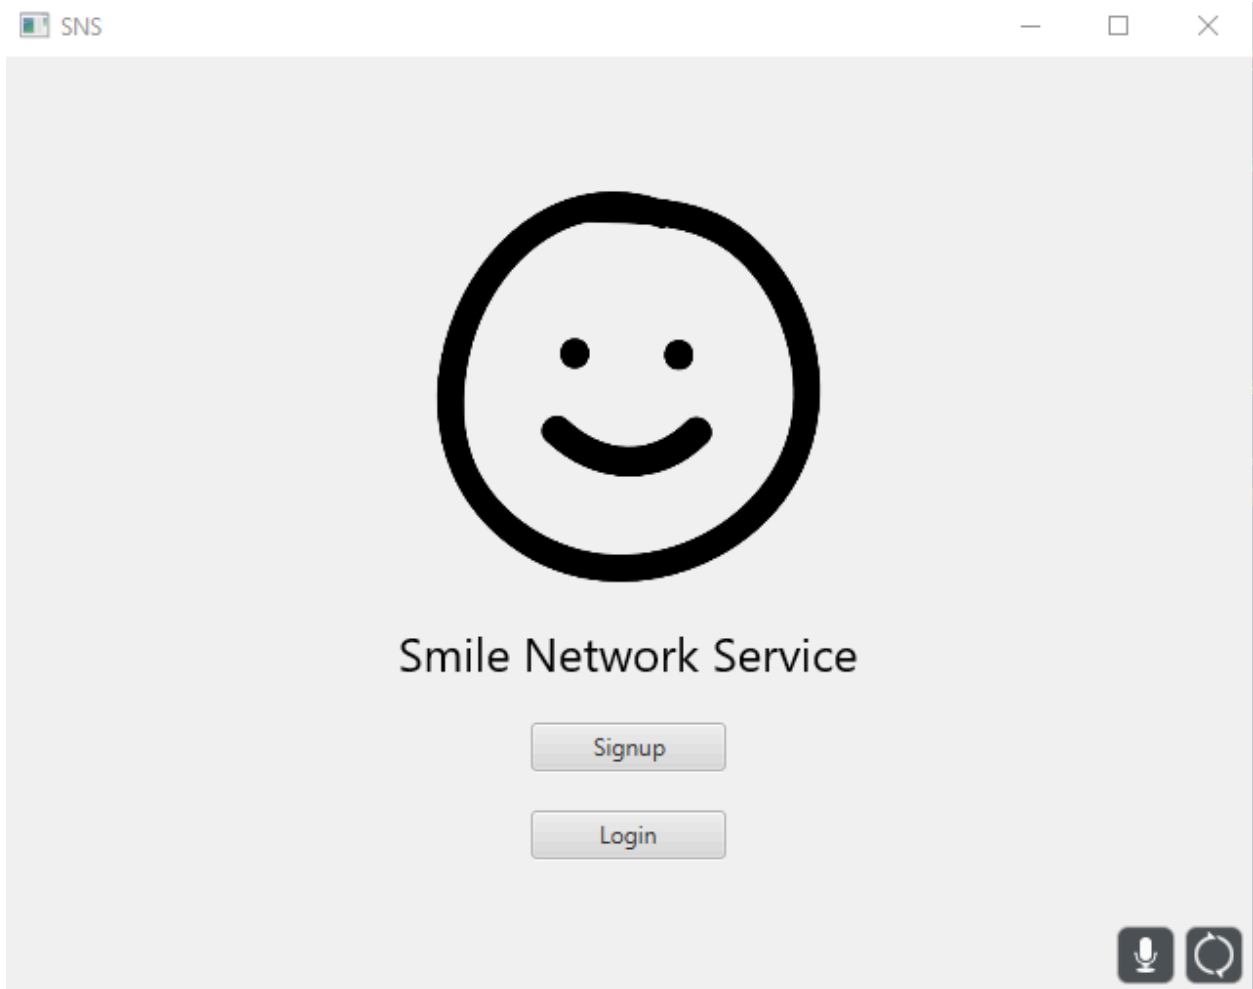

After setting up my environment variables and IDE to build javaFX projects I got a maven tab.

|	

> OUTLINE
> TIMELINE
> VS CODE PETS
> JAVA PROJECTS
∨ MAVEN   𝖳 + ↻ 🗗
  ∨ *m* application assignment:a...
    > ↻ Lifecycle
    ∨ ⊞ Plugins
      > 🔧 compiler org.apache....
      ∨ 🔧 javafx org.openjfx:java...
        jlink
        run
      ∨ 🔧 clean org.apache.mav...
        clean
        help
      > 🔧 resources org.apache....
      > 🔧 jar org.apache.maven....
      > 🔧 surefire org.apache.m...
      > 🔧 install org.apache.mav...
      > 🔧 deploy org.apache.ma...
      > 🔧 site org.apache.maven....
	Whenever I try to build my project:
	  1. I first click clean under the clean tab
	  2. after run under javafx.
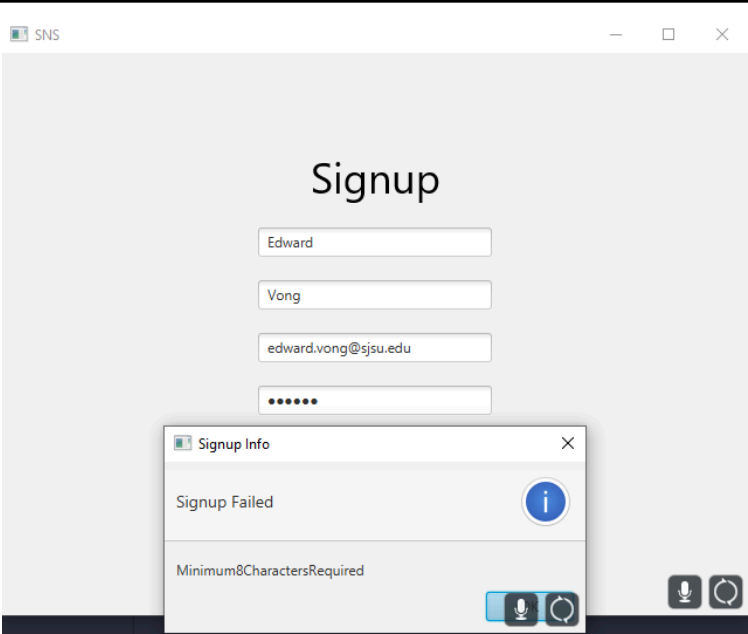

Start Screen:
